The Privatization of the Post-2015 Development Agenda

Issues and Challenges in Partnerships with the ‘Private Sector’

“Partnerships” for sustainable development are increasingly being promoted as a major, if not the primary, enabler for the implementation of the successor international sustainable development goals to replace the Millennium Development Goals (MDGs) by 2015. However, a growing number of civil society groups warn against a partnership approach that places primary emphasis on enticing private sector participation and investment as this risks reinforcing the corporate capture of the post-2015 agenda.

This one-and-a-half hour Public Forum aims to inform civil society organisations and member-states with critical perspectives on the major issues and challenges associated with partnerships with the “private sector” for sustainable development.
