Global Food Aid Deliveries by Donor and Category:

In these tables, global food aid deliveries include all food aid delivered by multilateral, bilateral and NGO channels. The figures below refer to the quantities of food aid actually delivered to recipient countries during the year 1988. These quantities may have been decided upon, ordered, shipped or purchased during the previous year. Cereal quantities are expressed in grain equivalents, non-cereal commodities are expressed in actual quantities.

(1) Emergency Food Aid is destined to victims of natural or man-made disasters. It is freely distributed to targeted beneficiary groups, and is usually provided on a grant basis. It is channeled multilaterally, through NGOs, or, sometimes, bilaterally.

(2) Project Food Aid aims at supporting specific poverty-reduction and disaster-prevention activities. It is usually freely distributed to targeted beneficiary groups, but may also be sold on the open market and is then referred to as “monetized” food aid. Project food aid is provided on a grant basis and is channeled multilaterally, through NGOs, or bilaterally.

(3) Program Food Aid is usually supplied as a resource transfer for balance of payments or budgetary support activities. Unlike most of the food aid provided for project or emergency purposes, it is not targeted at specific beneficiary groups. It is sold on the open market, and provided as a grant, or as a loan.

Global Food Aid Deliveries by Donor and Supply Mode:

In these tables, global food aid deliveries include all food aid delivered by multilateral, bilateral and NGO channels. The figures below refer to the quantities of food aid actually delivered to recipient countries during the year 1988. These quantities may have been decided upon, ordered, shipped or purchased during the previous year. Cereal quantities are expressed in grain equivalents, non-cereal commodities are expressed in actual quantities.

(1) Local Purchases account for the food aid procured in a country and used as food aid in the same country.

(2) Triangular Purchases are the food aid purchases or exchanges in one country for use as food aid in another developing country.

(3) Direct Transfers include all food originating from a donor country.

* Occasionally, there may be local purchases in and triangular transactions from countries that are not developing countries.
